

WHAT'S NEW

SYSTEMS

A Loaded 68020 System

Designed and built in England, the Omega is a full-featured 68020-based workstation that includes a 68881 math coprocessor and 1 megabyte of zero-wait-state nonvolatile static RAM. Also included is the OS9/68K real-time, multitasking operating system from Microware Systems.

With a processor running at 12.5 MHz, other standard features of the Omega include a fully buffered 16-bit data bus with 24 address lines, a 25.5-megabyte hard disk drive, a 1.2-megabyte floppy disk drive, four RS-232C serial ports, a parallel printer port, a bidirectional high-speed 16-bit parallel interface, and an RS-485 network node.

Hardware options for the Omega include higher clock speeds of 16.67, 20, or 25 MHz. There's also a 640- by 480-pixel by 16-color display controller, a 1- or 4-megabyte memory-expansion board, an intelligent network node controller, a prototyping board, an EPROM programmer, a 100-megabyte hard disk drive, and a tape backup unit. On the software side, there's a variety of language compilers, an applications generator, a cross assembler and debuggers, and several business applications.

Price: 12.5-MHz version, \$4750; 16.67-MHz version, \$4950; 20-MHz version, \$5495; 25-MHz version, \$6895.

Contact: Lloyd I/O Inc., Omega Sales Dept., 19535 Northeast Glisan St., P.O. Box 30945, Portland, OR 97230, (800) 227-3719. **Inquiry 754.**

The Omega is a feature-packed system from England.

NEC's Desktop-Publishing System

If you have an urge to get into desktop publishing but feel constrained by your current display and controller, you can add NEC's MonoGraph System to your IBM PC or compatible and be ready to roll. A complete full-page display system, the MonoGraph System has a square-screen monitor; a controller board for the monitor's 1024- by 1024-pixel maximum resolution; a cable to connect the two; and driver, font, and diagnostic software.

The system's square-screen analog monitor has a

16-inch CRT with 100-dot-per-inch dot density, an aspect ratio of 1 to 1, and a flicker-free display. The monitor measures 14 by 14 by 17 inches and includes a tilt-and-swivel base.

The video-controller board requires a full-length 8-bit slot and features an Intel 82786 graphics processor running at 10 MHz. It has a CGA emulator that displays CGA-compatible software in double-scan mode, with twice the standard resolution and double the pixels per dot.

On the software side, the MonoGraph System comes with 15 fonts for both Aldus PageMaker and Ventura Pub-

lisher. Software drivers for Microsoft Windows and Ventura Publisher are also included, as is a full set of diagnostics.

Price: \$1999.

Upgrade Your Zenith

A new upgrade kit from Zenith Data Systems (ZDS) lets you upgrade any Zenith Z-248 PC- or AT-compatible system to a 16-MHz, zero-wait-state, 80386-based computer with a 32-bit bus.

The ZDS SuperSet upgrade kit contains three 32-bit system boards (I/O, 1 megabyte of RAM, and the 80386 CPU board). ZDS claims it takes less than 30 minutes to install and that it works with any Z-248 system, including those supplied to the U.S. Department of Defense.

After you install the SuperSet upgrade, your system will become a Z-386 with five open bus slots, 1 megabyte of RAM (expandable to 16 megabytes), serial and parallel ports, and sockets for both 80287 and 80387 coprocessors. The Z-386 will support dual hard disk drives, dual floppy disk drives, and a tape backup unit.

Price: \$2699.

Contact: Zenith Data Systems, 1000 Milwaukee Ave., Glenview, IL 60025, (800) 842-9000, ext. 1.
